Subject Submission to Hazelwood coal mine fire inquiry

Submission:
Dear Board of Inquiry,

I welcome the opportunity to make a submission to the Hazelwood mine fire inquiry. I am deeply concerned that it has taken a fire of this magnitude and

level of community disruption to drive a serious assessment of the risks associated with the mine site and the potential impact on our communities.

I am writing this submission to request that your investigation take account

of

the following:

 Health effects: The health effects of the fire need to be fully understood,

and the inquiry should recommend a separate public inquiry into the long-term

health effects on the affected population.

2. Fire policy: If the fire prevention policy was adequate, then the fire should

not have taken hold. Media reports have suggested that the fire-fighting pipes

and sprinklers had been removed, which is alarming if true.

3. Origins of fire: I was shocked to learn that there are small fires in the

mine that have been burning for years. The Inquiry should investigate the source

of the fire, and the contributing role these "hot-spots" in the mine might

have made to the outbreak of the mine fire.

4. Rehabilitation bond: Rehabilitation means the mine site should be left clean

and safe. I am concerned that the very small rehabilitation bond for the Hazelwood mine will mean GDF Suez is less likely to properly rehabilitate the

site, leaving a burden of possibly hundreds of millions of dollars to $\operatorname{Victoria}$

taxpayers.

5. Quality of rehabilitation: Hazelwood's mining licence requires them to do

"progressive rehabilitation" of the mine. I am concerned that the coal in

area that should have been rehabilitated as it hadn't been mined for $\operatorname{decades}$

was still able to catch on fire. It suggests that existing rehabilitation requirements were inadequate or not enforced.

6. Enforceable timelines: I think the Hazelwood Work Plan should have

enforceable timelines for rehabilitation, to ensure disused parts of the \min

are rehabilitated and made safe as quickly as possible.

7. Public findings: Given that this inquiry is investigating the

causes of a major public health disaster, I feel it is important that the inquiry's findings be made public very shortly after the completion of your report.

I acknowledge that $\ensuremath{\mathsf{my}}$ submission will be treated as a public document and $\ensuremath{\mathsf{may}}$

be

published, quoted or summarised by the inquiry.

Regards,
