Incident Action Plan for <sup>Ross Male</sup> Division Com  
Night

68

Day shift 10/2/14

Mine Division . Hazelwood mine

Current situation

have uncontrolled fire on the North Batter of mine  
3 levels Approx 2 km in length

have uncontrolled fire on the East Batter of  
Mine Approx 1 km in length.

Both these Batters are older unused sections of  
mine.

Uncontrolled fire on the floor of the mine  
Approx 500m x 500m

Conveyors and mine infrastructure of the  
West Batters are not affected

Work is being done to restore 66 kv Power  
to mine so that pumps can be reinstated  
So that water blanchers can protect these  
assets

Coal production has stopped to Power station  
Hazelwood Power station is shutting down at this  
moment Down to 2 units and will be  
off line at 0700 if coal production <sup>①</sup>  
cannot be started.

69  
At the moment CFA Tankers are being used to provide asset protection to key assets within and around mine

66 kV Power poles on Northern side of mine, Northern Maxwell sub station

clean water Pump station + Dirty water

Pump station within mine

Work is being done to restore power to the mine. Dredge II is expected to be back in production in the next couple of hours.

Water has been lost to 2 water pipe lines. Work is being done to divert water to maintain pressure to mine infrastructure.

## Day shift Objectives

70

Continue to provide Asset protection to key infrastructure in and around mine to protect working Batters of mine and plant to continue Coal supply

Protection of 66 kv lines North side of mine

Protection of clean and dirty water Pump Stations

Protection of Morwell sub station

Protection of west side of mine from Driffield fire

Using ground monitors + crane monitors as well as tankers to start working on Coal fires on North and East Batters of mine

North Sector

Concentrate on North Batter working from West end utilizing Ground monitors, Crane Monitors Teleboom on hard standing areas near reticulated water.

1x CFA strike team to provide asset protection on North perimeter Road for SP Ausnet crews to restore Poles on 66 kv lines  
Asset Protect Dirty Water Pump station

Central Sector

Provide tanker strike team to asset Protect clean water Pump station and attack fire on mine floor with ground Monitors

East Sector

East Batter using 1x CFA strike team and water Bombing working from West end assess hard standing for areas for Pumpers with deck monitors to work face near reticulated water

West sub perimeter

1 x tanker strike team to patrol

Prevent fire from Driskfield entering mine

Water Bombing as necessary

- \* Utilize Scarsby hose layer as required to supply monitors within mine
- \* Health monitoring and Hazmat detection team to monitor CO levels of personnel as required
- \* Pumper strike team to be utilized in mine and surrounds as required depending on hand standing areas and reticulated water.
- \* portable repeater x 2 to be set up either side of mine to assist with Radio Comms

Resourcing

4 x CFA Tanker strike teams (4x4)

1 x teleboom

1 x Scorsby Hose layer

1 x Pumper strike team

CFA Health monitoring

Hazmat detection monitors (Remote)

2 x mobile radio Repeaters (have 1 on site now)
