Subject: FW: Bush fire Hernes Oak area

Hi Alex

See below, for the moment all clear with that bush fire but Hazelwood remains on high alert.

Luc

Best regards,

Luc Dietvorst

Hi Luc,

Just to close this out the CFA website at 9.51am today states that fire activity has subsided, the bushfire is now safe.

CFA crews will remain on scene throughout the day monitoring conditions. The highway remains closed due to smoke but it is anticipated to re-open later this morning

Hazelwood remains on alert as per high fire danger protocols.

Regards

George

Hi Alex

Just to let you know that an out of control Fire is in progress in the Hernes Oak area (across the Highway from Yallourn). The incident was reported to have started just after 1500hrs and is moving along fairly rapidly. There are several CFA appliances in attendance but it is not under control.

44

Initially the fire direction was such that it was heading in the Hazelwood direction. The Mine is on alert and additional water spraying has been occurring and spotting teams have been deployed. The fire has however turned toward the Yallourn direction. The Highway is now closed due to smoke.

Currently there is no threat to the Hazelwood business. There are infrared cameras installed to detect intrusions of the sit and they are currently used to monitor potential hot spots.

Keep you posted.

Luc
