## Low level bushfire smoke advisory

**Thursday February 13 2014**

EPA Victoria has issued a low level smoke alert for Melbourne, Geelong, Gippsland and East Gippsland, today and tomorrow, as a result of bushfires.

A low level alert means that it is likely residents will see ongoing smoke impacts, with visibility reduced to between 10 – 20 kilometres due to high particle concentrations in the air.

The Victorian Chief Health Officer Dr Rosemary Lester advises the elderly, children and those with existing heart or lung conditions to limit prolonged or heavy physical activity.

“Where possible this sector of the community should also limit the time spent outdoors.” Dr Lester said.

“Anyone with a heart or lung condition should take their medication as prescribed by their doctor.

“People with asthma should follow their asthma management plan.

“Everyone should keep informed about fire activity in their immediate area. Anyone with concerns about their health should seek medical advice or call NURSE-ON-CALL on 1300 60 60 24.”
