*** My observations and proposed actions**

(Inspector or Authorised Officer to specify any Notices or Directions and any attachments to this Field Report.

Instructions issued under the MRD Act 1990.

Where more than one Notice/Direction requires updating, list these below providing the same details as required within the box above

1. D9 Tub grease spill and cleaning complaint was discussed with Mr B. Estrada and complaint closed.
2. Fire on rising conveyors and in the bunker was discussed. The fire was reported with 6week delay. The fire investigation was concluded on 19/01/04 the following instructions are issued:
 - a) The risk of fire at heights needs to be assessed and control measures implemented accordingly.
 - b) Communication and command need to be revisited to ensure that emergency plan, preparedness, an response are relevant to the nature of the emergency. Consideration to be given to:
 - Identifying, listing and communicating major assets that must be protected first by combat agencies.
 - Role and the capacity of others such as contracted services need to be revisited and inc
- 3) An action plan that addresses the above instructions is requested within 14 days of the date of this report.

Greg Sleziak
