Dear Ken

### PROPOSED LIVE COAL FACILITY - HAZELWOOD MINE

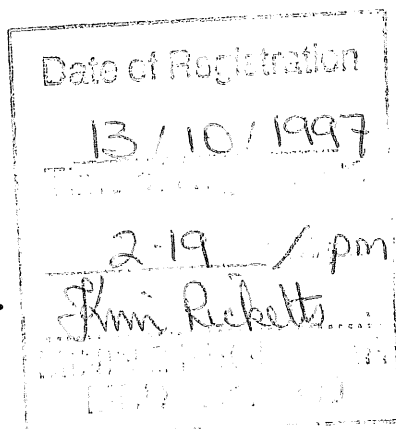

As discussed recently over the phone, Hazelwood Power proposes to construct a Live Coal Facility to the South of its existing Slot Bunker. This facility will have a storage capacity of up to 250 000 tonnes of coal. Target completion date is the end of September 1998.

Although not directly related to mining operations we wish to inform you of our plans as it is a very significant project for our business. I have enclosed copies of plans and an aerial photograph of the proposed site.

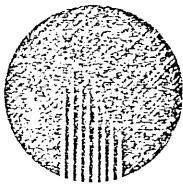

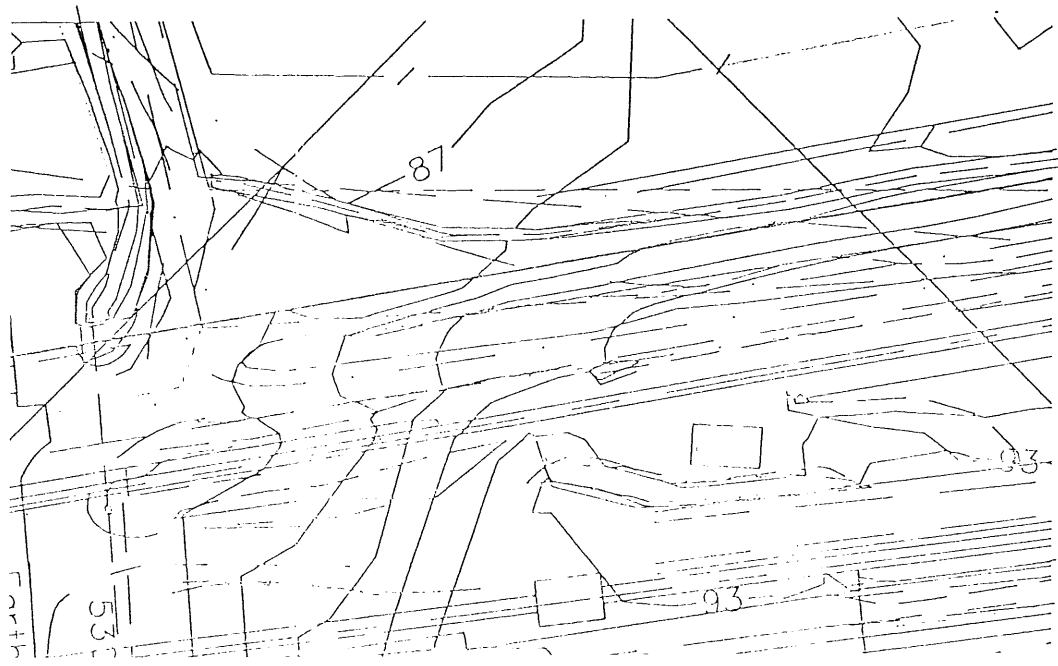

Although we do not believe that this project raises regulatory compliance issues under the Mineral Resources Development Act we would be interested in your view on this.

Yours faithfully

David Eves
