Hi Chris.

As discussed by phone last night I look forward to your Email update this morning on the above matters given the imminent mine closure occurring and proposed Rehab processes. These include-

Updates from the April 2015 Employer Action plan response from 2014 verification. Emergency Management Plan update, risk assessments and CFA feedback review. Proposed Rehabilitation plan as so far as it relates to future mine employee involvement with Batter stability, mobile plant safety and traffic control and associated clay covering time frames.

Thanks
